INTERNATIONAL STARCH REPORT

Inter Pleation No. 2 4 L

A. CLASSIFICATION OF SUBJECT MATTER IPC 7 A61K35/78

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols) IPC $\,7\,$ A61K

Documentation searched other than minimum documentation to the extent that such documents are included. In the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, EMBASE, BIOSIS, PASCAL, CHEM ABS Data, CANCERLIT, SCISEARCH

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)				
This Inte	ernational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1.	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:				
2. X	Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically: see FURTHER INFORMATION sheet PCT/ISA/210				
з. 🗌	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).				
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)				
This inte	rnational Searching Authority found multiple inventions in this international application, as follows:				
,					
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.				
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.				
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:				
4.	Nic required additional search fees were timely paid by the applicant. Consequently, this International Search Report Is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:				
Remark	on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.				

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.2

Present claim 1 relates to the following plant extracts: Sida sps., Boerhaavia diffusa, Vitis vinifera, Tinospora cordifolia, Withania somnifera.

However, the independent claim 9 refers to different plants (Phyllanthus sps., Glycyrrhiza glabra, Boerhaavia diffusa, Vitis vinifera, Tinospora cordifolia, Withania somnifera).

Moroever, claim 11 refers back to claim 9 defining the percentage ratio of several herbs. However, the herbs of claim 11 are different to those of claim 9.

These inconcistencies lead to a lack of clarity (and/or conciseness) within the meaning of Article 6 PCT to such an extent as to render a meaningful search of claims 9-10,12-16 impossible. Consequently, claims 9-10,12-16 have been searched incompletely.

The search has been carried out for those parts of the application which do appear to be clear (and/or concise), namely the combination of the five herbs Sida sps., Boerhaavia diffusa, Vitis vinifera, Tinospora cordifolia and Withania somnifera and a method for its preparation.

The herbs Phyllantus sps. and Glycyrrhiza glabra were not searched because of the inconcistency between claim 1 and 9 and 11 leading to a lack of clarity within the meaning of Article 6 PCT. Claim 9 seems to refer to a plant composition according to claim 11. Thus, the mixture of herbs according to claim 1 and 11 were searched.

Moreover, a mixture of less than 5 herbs lacks support within the meaning of Article 6 PCT since examples 1-8 only refer to a combination of all 5 herbs.

The applicant's attention is drawn to the fact that combinations of only two different herbs would result in a lack of unity since the application would refer to many different herbal compositions, each of them representing a single general inventive concept (Rule 13.1 PCT).

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
